

LAKSHAY MAHAJAN

AI Developer · Generative AI · Full-Stack Development

+91-9810883077 | lakshaymahajan3605@gmail.com | [GitHub](#) | [LinkedIn](#) | Delhi, India

PROFESSIONAL SUMMARY

Fourth-year B.Tech CSE (AI & ML) student and AI Developer with hands-on experience building LLM workflows, RAG systems, AI-powered applications and full-stack products. Experienced in prompt engineering, LLM evaluation, AI system design and API integration, with leadership experience across technical projects and developer communities.

STRENGTHS

Leadership & Ownership — Leads AI clubs, mentors peers, and independently drives cross-functional projects across college and professional environments.

AI & Technical Depth — Applied expertise in LLM training, prompt engineering and end-to-end AI workflows through professional and research environments.

WORK EXPERIENCE

AI Developer *KVGAI Tech*

Jan 2026 – Present

- Design and evaluate training datasets for LLMs; contribute to Claude Opus 4.5 training workflows through prompt engineering and evaluation pipelines.
- Build an end-to-end AI SaaS pipeline integrating multiple APIs for image generation and automated Instagram publishing.
- Lead AI projects with cross-functional ownership and onboard new team members.

Research Project Developer *ICSSR Sponsored, Inderprastha Engineering College*

Ongoing

- Building a full-stack legal-awareness platform with an AI chatbot and collaborating with faculty on requirements, scope and feature development.

PROJECTS

Lakshay.ai — Personal AI Twin & Portfolio ([Click here to view](#))

- Building an AI-powered portfolio with a conversational personal AI twin that enables recruiters and visitors to explore my experience, projects, skills and professional background through natural-language interaction.
- Developed a custom knowledge system using RAG, prompt engineering, persona-aware response generation and real-time streaming.
- Built with Next.js and a modular AI backend designed for scalable LLM and API integration.

Jagruk Mahila — AI-Powered Legal Awareness Platform ([Click here to view](#))

- Developing an ICSSR-sponsored platform focused on improving legal awareness and accessibility for Muslim women.
- Integrated an AI chatbot to provide conversational access to platform information and legal-awareness resources.
- Contributing to full-stack development, AI integration, requirements and feature design in collaboration with faculty.

TECHNICAL SKILLS

Languages	Python, C++, JavaScript, HTML/CSS
AI & ML	LLM Training, Prompt Engineering, RAG, Fine-Tuning, LLM Evaluation, AI Workflows, AI System Design
Web & Backend	Next.js, React, REST APIs, Server-side Logic, Database Design
Tools / APIs	Git/GitHub, VS Code, Google Gemini API

EDUCATION

B.Tech – CSE (AI & ML) *Inderprastha Engineering College (AKTU)*

Expected May 2027

Coursework: DSA, OOP, AI, DBMS, CS Fundamentals

Class XII — Greenfields Public School (2023) | Class X — Greenfields Public School (2021)

LEADERSHIP & ACHIEVEMENTS

President *THINK AI Club & HWI IPEC (HackWithIndia), Inderprastha Engineering College*

- Organise AI workshops, hackathons and guest sessions; mentor peers across technical projects and developer-community initiatives.

National Hackathon Winner — “Bid to Code”, JECRC Jaipur (led team among 100+ national teams)

Smart India Hackathon (SIH) — Top 50 Finalist
